matej@lednický.name

Slovakia, Europe (Central European Time, UTC+1)

Summary

I am a fullstack software engineer, frontend leaning. I solve complex technical problems and help shape both product and architecture. I know how to build and deploy scalable systems. I enjoy improving user experience on all devices. I like the challenge of integrating new technologies into existing infrastructures. As a collaborative team player, I can provide technical guidance and leadership to engineers across the organization. I hold high expectations of both myself and my team.

Resources

- Open-source projects: <https://github.com/mathio/>

- LinkedIn: <https://www.linkedin.com/in/lednický/>
- X / Twitter: <https://twitter.com/mathio28>

Skills and tech stack

- Javascript (Typescript, Vanilla Javascript, Node.js, React, Redux, Next.js, React Router / Remix.js, Vite, Webpack, Unplugin, Chrome extension, Apollo GraphQL, Vue.js)
- Frontend development (HTML 5, CSS, Sass, Tailwind)
- Software testing (Jest, Vitest, Playwright, Cypress)
- SQL databases (PostgreSQL, MySQL, Prisma ORM, Supabase)
- NoSQL databases (MongoDB, Redis)
- DevOps (Git, CI/CD, Github, Bitbucket, Gitlab, Travis, AWS, Terraform, Docker, Heroku, Dokku)
- AI Development: Cursor, Claude, Copilot

Experience

Sabbatical (09/2025 -)

- Taking a sabbatical to explore new technologies and recharge after 20+ years of active work

Founding Software Engineer - [Lingo.dev](#) (01/2025 - 08/2025)

- Joined as 3rd member of a fully remote team
- Architecture and development of software:
 - Delivered new features and improved performance of [lingo.dev open-source library and developer tooling](#) adopted by external users - including CLI, CI/CD integration and MCP
 - Released first version of [compiler library](#) for seamless localization of React apps
 - Released customer platform for setup, customization and validation of localization jobs
 - Integrated with 3rd party SaaS to enable translations of content created via those services
 - Improved performance and built new features for localization engine API with LLM integration
 - Proactively led CI/CD automation and Docker-based deployment, improving delivery speed, reliability and developer experience
- Communicated with customers, shaped and built new features based on their feedback and requirements

Expert Software Engineer (E4) - [Typeform](#) (01/2020 - 12/2024)

- Member of fully remote engineering team
- Led architecture and development of core platform features used by millions of users:
 - Built and maintained open-source libraries: [Embed SDK](#), [Button for creator experience](#)
 - Owned redesign of [share panel](#), improving UX and engagement metrics
 - Improved respondent experience across devices and 3rd party platforms (embeds)
 - Built integrations with 3rd party SaaS, eg. [Webflow](#)

- Participated on delivering the "multiple questions per page" feature, touching all parts of the platform
- Led reCAPTCHA integration in the platform, enhancing security for all forms
- Supported developer community via [public developer docs](#) and [embed SDK initiatives](#)
- Contributed to company-wide TypeScript adoption and CI/CD pipeline improvements
- Cross-team feature ownership and support of other teams with their tech decisions

Volunteering for [Slovensko.Digital](#) (2020 - 2021)

- Joined as a member of volunteer team
- Contributed to development and release of first version of [priznanie.digital](#) app in Next.js to facilitate filing tax return for self-employed professionals
- Led the development of second version with legislation updates for subsequent year

Senior Software Engineer II - [GoHealth](#) (2011 - 2019)

- Architecture and development of proprietary web-based software for:
 - Delivered web apps to support sale of health insurance to US customers integrated with in-house and 3rd party APIs
 - Built infrastructure for rapid experimenting to support lead generation
- Member of and leader of a distributed development team based in USA (Chicago) and Slovakia (Bratislava)

Web Developer - [FAT CHILLI](#) (2010 - 2011)

- Management of the development team delivering custom web solution for multinational clothing brand, communication with clients' office in UK
- Development of high traffic Slovak real-estate advertising portals and related back office software

Web Developer - [Elite Solutions](#) (2008 - 2010)

- Web development for clients ranging from simple CMS websites (Joomla, Drupal, Wordpress) to custom e-commerce platforms and community solutions

Junior Web Developer - [Global Services Slovakia](#) (2004 - 2006)

- Gained first professional experience with web development

Open-source side projects

- [Runner Cleanup Action](#) (2025) - GitHub Action to reclaim disk space on CI/CD runners
- [New Tab Page Bookmarks](#) (2022) - Browser extension to manage bookmarks on New Tab page
- [dbbackup](#) (2022) - PostgreSQL cloud backup and restore tool with web UI
- [Conway's Game of Life](#) (2022) - Javascript implementation of the zero-player game
- [next-api](#) (2020) - Content REST APIs for fast prototyping of Next.js frontends

Education

- 2013 M.Eng. in Managerial Decision Making and Information Technologies, University of Economics in Bratislava
- 2011 B.Eng. in Applied Informatics, Pan-European University, Bratislava
